DAR Form A-3
Request for Rodent Acquisition from Other Institution

Please provide full information. Failure to provide full information may result in delays and additional shipping charges.

Emory Investigator Information

Date Request Initiated: _____ Requested Shipment Date: _____
 Full Name: _____ Department: _____
 Contact Person (if different from PI): _____
 Campus Address: _____
 Phone: _____ Fax: _____ E-mail: _____
 Approved Emory IACUC Protocol #: _____ Emory Account #: _____

Animal Information

Genus and Species: _____

Proposed Animal Use: Establish breeding colony Acute study Chronic study

For mice, we recommend shipping frozen embryos. This process tends to be less expensive and time consuming than shipment of live mice, and decreases the possibility of disease transmission.

Can the shipping institution send frozen embryos? Yes No

Would you like to use this option? Yes No

If yes, we will provide you with the form needed by Emory's Mouse Transgenic Core Lab (<http://corelabs.emory.edu/tmf/>) to arrange for rederivation.

If no, please explain why not:

Strain/Stock (Complete strain name required or form will be returned)	Sex	Number of animals	Date of birth or approximate age	Identification number and/or color

1. Are the animals immunosuppressed? Yes No

2. Do these animals make antibodies? Yes No

3. If “yes,” please provide a literature reference or other evidence to support the above statement.

4. If “no,” will these animals be bred with immunosuppressed animals? Yes No

5. Are there any phenotypic characteristics of which DAR needs to be aware? _____

6. Do these animals require special care, i.e. sterile caging, acidified water, back-crossing, food, etc.)?

7. Are you paying the cost of the shipping? _____

8. It is recommended for founder mice to be genotyped after arrival to guarantee the correct mice were shipped. This should be done before any mice are set up as breeders.

I would like to have tissue samples for genotyping _____

I DO NOT want tissue samples _____

9. Are your mice going to the Breeder Colony in Whitehead to be managed by Minida Dowdy?

Colony Health Status (regarding the following pathogens): HEALTH REPORT FROM ATTENDING VETERINARIAN REQUIRED

1. Ectoparasites (i.e. lice, mites)
2. Endoparasites (pinworms, protozoa)

3. Mycoplasma pulmonis
4. Pathogenic viruses: Mouse hepatitis virus, Sendai virus, Pneumonia Virus of Mice, Minute Virus of Mice, Mouse Parvovirus, GD-7, Reovirus-3, Mouse Adenovirus, Polyoma virus, Ectromelia virus, Lymphocytic Choriomeningitis Virus, Hantavirus
5. Bacterial pathogens: Corynebacterium kutscheri, Streptobacillus moniliformis, Salmonella spp., Citrobacter rodenticum
